

Dear BLM,

I am deeply saddened that BLM's new draft fracking rule is even weaker than the previous version. These regulations seem designed to encourage as much fracking as possible, while doing little to protect the environment or people's health.

The best way to protect our air, water, wildlife, climate, and public health from fracking is simply to prohibit this inherently dangerous form of fossil fuel extraction. I urge you to ban fracking on our public lands.

Moreover, there are many egregious flaws in the BLM's revised draft fracking regulations.

1. The regulations would expand "trade secret" loopholes, allowing well operators to avoid disclosing use of dangerous fracking chemicals.
2. The rule would require oil and gas companies to report only the chemicals they used that are not claimed to be trade secrets, and only after fracking had already taken place.
3. The rules provide little regulatory protection for water, air and climate. The regulations do nothing to protect people living near fracked wells from air pollutants that increase risks of cancer and respiratory illness. They do not protect residents from exposure to, or contamination by, the large volume of toxic wastewater fracking produces.
4. There is no requirement to collect and disclose baseline data on air and water quality needed for effective regulation.
5. The rules even ignore the advice of the Obama administration's own advisory board.

The best way to protect our revered public lands and our water, air, health and climate from fracking is to prohibit this inherently dangerous form of fossil fuel extraction. Please ban fracking on public land.

Sincerely,

Soil also contaminated, houses, basements. No disclosure to the public of the source, its seems to be a secret, MONEY is always the source of secrets kept! No controls as there seems to be no cap on the number of camps, therefore, there will not be enough policing of the camps, more contamination, no accountability. What about future generations?	8/9/13 13:03
Shoshana	Wechsler	94708	CA			8/9/13 13:03
peggy	crouch	81050	CO		We are destroying air and water quality and MUST stop all tracking everywhere!!	8/9/13 13:03

					There are too many reasons to try and express in writing or in words my gut and core complaint. All I can reference in regards to feelings and concerns and fears on this subject is a book by T. C. McLuhan entitled "Touch The Earth. In that book the author has chronicled the words of a people who were good stewards of the North American continent. Reading the aboriginal account in the context of their surrender and defeat and genocide, spoken by the leaders who were in the field of combat and chased out of their ancestral homes may impress some today to see that the same single-mindedness of purpose which brought an entirely new group of people to this continent can unchecked ultimately bring unwanted consequences on those same people. The error of these ways brought about by an overarching ideology of slash and burn cannot endlessly be repeated without system compromise and then system failure with no practical recovery solution for living creatures of any species period. We do not own the earth no one owns the very thing that they are made from! So as offspring, from mother earth let us be contrite and try to preserve her out of deep respect for all she has passively done for all creatures up to today.

Alan Mehrzad	Mehrzad	29042	SC			8/9/13 13:16
Lee	Grygo	94109	CA			8/9/13 13:16
Leslie	Roberts		IL		It is insane to ruin our environment for short-term profits of the few. To try to get every drop of oil and gas out of the ground to be burned is insane because gas and oil in the earth are the storage places for excess carbon and methane, in order for the atmosphere to have the planet sustain life. Putting all that co2 and methane, 2 greenhouse gases with the latter being 20 times worse than the former, will tilt the delicate balance.	8/9/13 13:16
Catherine	France	02659	CA		It is obvious: our public land is to be protected from harm, cared for and preserved. Allowing fracking on it is without any integrity or stewardship. The gains of oil or natural gas is not worth it for us American citizens and the natural ecosystems within these lands.	8/9/13 13:17
tony	Hecht Charitable Lead Annuity Trust	96790	HI			8/9/13 13:17
Gary	Bloom					8/9/13 13:17
Mary	Norcross	17844	PA			8/9/13 13:18
Marianne	Quasebarth		OH		Fracking is an irreverent irresponsible practice that does not help our energy issues or our economy in either short term or long term. Fracking should be banned nationwide. as it destroys underground aquifer systems and pollutes land and water above and below ground for centuries to come. Anyone who supports fracking is setting up our country for long term issues and problems with water. Oil and gas are working hard to ensure that the privatiization of weate will have to ccur because all the natural water systems will be too polluted. Please be responsible and forward thinking of the centuries into the future. A natural livable environment will do more in the long run for generations of economic interest and tourism than a devastated raped and polluted land and water environment. What so you want as your legacy?	8/9/13 13:19
rebecca	tippens	01340	MA			8/9/13 13:20

Dyan	Muse	77611				8/9/13 14:08
Janet	Neihart	55016	MN		Fracking ruins the environment and puts people's lives in danger due to groundwater contamination with toxic, and even flammable, pollution.	8/9/13 14:09
Hope	Grable	60914	IL			8/9/13 14:10
Valerie	Reynolds	84533	UT			8/9/13 14:10
Susan	Shaak	19606	PA			8/9/13 14:10
Mindy	Otto	49808	MI	Yellow Dog Riverkeeper	The fracking ban will protect the land in this country so we don't become a nation of industrial wastelands and polluted drinking water and so we remain a nation of beautiful national parks and public areas. We need to take the long view on fracking and realize we are selling ourselves short on an industry that cares little for the fact that oil and gas are finite and will not sustain our industrial needs. We should instead invest that money in new renewable technology or healthcare. Look past the five or ten or even fifty years, please. Thank-you.	8/9/13 14:13
Peter	Coleman	10309	NY			8/9/13 14:13
Omar	Bonet	27006	NC		This is destructive to people and environment.	8/9/13 14:15
Deb	Daboub	76209	TX		Fracking pollutes the environment. You can't drink gas when the water becomes too dangerous to drink.	8/9/13 14:18
Phyllis	Greenleaf	95062	CA		FRACKING WILL POISON OUR WATER AND EARTH. LETS STOP IT NOW ON BEHALF OF ALL OF OUR CHILDREN AND GRANDCHILDEN. LETS INSTEAD INVEST IN SOLAR ENERGY.	8/9/13 14:18
Christine	Money	07853	CA		Fracking brings with it too many dangers and can permanently poison the areas' soil and water. Fracking is a short-sighted endeavor and no answer to switching to non-carbon-based energy production.	8/9/13 14:18
Mr. Timothy Crews	Crews	32580	FL			8/9/13 14:21
Darian	Mark	10022	IL			8/9/13 14:23
Eric	McDevitt	97008	OR			8/9/13 14:23
Martin	Filipowski	10925	NY		It's the correct thing to do, we need to protect what's left of our planet!	8/9/13 14:25
Cindy	Krantz	53703	WI		Fracking will be a disaster for our country and our world. The advertisements claiming natural gas is a great alternative, are misleading and dangerous. Please give complete information when airing these ads or remove them entirely.	8/9/13 14:26

Ken	Deschere	14850	NY		So much of our public land and the wildlife it should support is already in peril, due to fire, drought, and deforestation. Please DO NOT add the horrors of fracking to these problems. We don't need the traffic, the water waste, the pollution or the methane leaking into the atmosphere. Please, let's leave SOMETHING WORTH HAVING for our future generations.	8/9/13 14:26
Ginni	Larosa	20872	MD			8/9/13 14:27
Stanley	Jacobs	10968	MA			8/9/13 14:27
Lisa	Provost	30317	GA		It is the right of each and every one of us to enjoy the healthy benefits of clean drinking water. What affects our citizens in one state, will ultimately affect us all. Please stop this insanity.	8/9/13 14:29
Tina	Henize	34601	NY		It's past time to move to alternative, clean energy technology. Every step to exploit fossil fuel to the nth degree bring more and more destruction. Some choose their own demise in order to avoid change, but that is ignorant, fulfilling those death wishes, and denial of the change that's coming anyway, whether they like it or not. Change now and the cost to everyone and everything over the long haul is far lower. It' OUR Public Land and we say NO to any more of the destruction of fracking or anything else on OUR LAND.	8/9/13 14:29
Juliet	Stratton	98034	IA		We currently have the opportunity and technology to reverse the damage done to our environment, and invest in clean energy technologies, but we continue to use outdated, archaic, and harmful practices, that rape our natural landscapes and poison our environment. It's time to think about the future of the planet and the legacy we will leave for future generations. I, personally, do not want to be responsible for the damage done by a few greedy, unscrupulous, unethical, and unconscious individuals. Stop fracking now!!	8/9/13 14:33
Kenton	Ewing	92683	FL			8/9/13 14:35
Krystl	Tonkin					8/9/13 14:37
Marty	Sickinger		OH		The risk is too great- the benefits too few. Public land is to be held for the people- not for the benefit of a few. The risk to our air and precious water is not worth it.	8/9/13 14:39
Ivy	Hoppes	68025	CA		Respect nature, respect ourselves.	8/9/13 14:39
Beverly	Polenick					8/9/13 14:40
Rekha	Nadkarni	22102	PA		Public land belongs to everyone, not private companies to make profit. Please help to keep these places pristine for the enjoyment of all.	8/9/13 14:41
Chris	Earley	80211	KS			8/9/13 14:43

Gail	Hartman	95409	CO		We need to preserve our public lands for future generations and fracking can release methane into the atmosphere, contaminate water and even cause earthquakes. Why should we endanger our public lands to enrich the oil companies?	8/9/13 14:44
James	Maki	90278	CA		Fracking uses precious water supplies and pollutes not only the fracking water but also underground water supplies. We don't need fracking on public lands.	8/9/13 14:44
Kathleen	Venemon	84098	UT		<p>moving away from petroleum, coal, and non-waste generated natural gas is long overdue. This country is on the road to collapse if you allow these interests to continue to dominate our economy. Our most precious resource is clean pure water. Of course you need clean air and land to insure this. The long term cost of the above named energy sources already exceed alternative forms. What we need is vision, not the same tired and greed motivated responses. In 1975, I predicted all of the following: the re-unification of Germany by the early 1990s, the rise of China as a dominate superpower, and its eventual breaking into at least three separate states(initially), the collapse of the Soviet Union(or empire as I called it) to occur by the late 1980s or early 1990s, world wide water shortages with devastating results, a change in the Earth's climate that would mean an increase of the extremes, be they storms, drought, ice-melt, and changes in the basic mechanics of the worlds oceans. Every single one of these things has happens or is in the process of happening. I also predicted the collapse of the American Empire. I am a patriotic citizen who has sacrificed much for my country. I have never sought to profit from my vision. I wish to help people acclimate to the changes that are needed if humanity is to survive another five hundred years, as a species, or one hundred years without going through such major trauma, that most institutions we now know will have vanished. I want to save this world, and this country. Although I am not an American Indian, I have been recognized, in an official manner, for both the abilities God has allowed me to use, and for my vision and the work I have done. I am in this because I have seen it is possible for people to overcome the problems that are facing us, although it will not be easy. It was in the late 1970s, that I suggested to several tribal chieftains, that instead of simply protesting mines that threaten the environment, that financial resources be used to purchase the mines after forcing their value down by a course of legal acts. So closed the Crandon Mine in</p>	8/9/13 14:45

Gertrud	Hain	21666	CA		Public Land needs to stay pristine. we need our parks to be able to recharge and destress from our daily built environment. Nature is infinitely varied, interesting and challenging. I took my very young grandchildren just recently camping and to see the joy in their eyes to be surrounded by trees and look up into the tree canopy gave joy in my heart. Their whole being expressed content and relaxation. We cannot take this very necessary connection to nature away; we will forget how interdependent we are and how much we are one.	8/9/13 14:45
nancy	pearson					8/9/13 14:46
Marvin	Soroos	27607	CA			8/9/13 14:47

Sabine	Hasselberg					8/9/13 16:19
Rick	Gordon	77035	TX		We cannot live with the detritus and poison left by the fracking industry. It's already killing many people - poor people who have begged to be left alone by the frackers. It's one of the most, if not THE most disgusting practices for obtaining energy I've ever seen. It must stop now.	8/9/13 16:23

Davide	Donzelli	62002	IL			8/10/13 0:55
Gary	Majeski	43609	OH		Public lands are just what it says...for the public. Industry despoils enough of the land space in the private sector properties it invades but the commons must be preserved for our continued enjoyment and for the enjoyment of future generations. There is a word in the dictionary called serenity and this is what we expect when visiting public spaces and parklands. Some places must remain unspolied. Please embrace that notion--before we lose all the beauty in this country, within one lifetime.	8/10/13 1:17
Stuart	Shaw	97304	NJ			8/10/13 1:25
Ryan	G.	53213	WI		A ban from tracking is important to me because it destroys the environment and there seems to be a lot of loopholes in fracking regulations. This, I feel, is an issue that needs to be addressed in the quickest and most effective means possible; alo.ng with the issue of fracking itself.	8/10/13 1:29
Ed	George	44111				8/10/13 1:38
John	Cuda	15221	PA			8/10/13 1:52
Elizabeth	Stucki	98501	WA			8/10/13 2:00
Melissa	Loftis	97504	OR		The Ban of Fracking is important to me because nature as we know it is in a state of danger. With all resources being tapped, it will only be a matter of time before nature as we know it will be nearly extinct, which in turn means the extinction of mankind. The more we "reshape" our land to get what we want out of it the more we ruin any future due to overharvest and waste of what is seen as unneeded. Once such an action like fracking is done there is no way of undoing it and it will be realized too late what a horrible impact these choices will and have made to our planet earth. If we take action now to preserve what little natural resources we have, we may still have hope of saving planet earth.	8/10/13 2:08

Adele	Poenisch	94705	FL		If they extract natural gas or any resources from public lands those who do must leave the area unharmed on any way. In other words they MUST clean up their own mess. Of this Means it will cost more to produce so be it. If they ignore this basic responsibility they have not done a truthful cost analysis of their product.	8/10/13 2:14
susan	carey	11357	NY			8/10/13 2:50
Pamela	Check	95926	CA		I am not "saddened", I am FURIOUS. This land is not for plunder, our water resources are to be protected. The only thing the BLM protects are private interests. If they can't do their jobs, dissolve them.	8/10/13 2:53
Carol	Kelly	94701	CA			8/10/13 3:00
Vivian	Stockman	25276	WV			8/10/13 3:13
pedro	nogueira					8/10/13 3:14
Parker	Kelly	91950	CA			8/10/13 3:28
Jeanette	Kors	98407	KY		Please don't pollute our precious natural resources with toxic chemicals that are used with fracking. Please don't increase the risk of explosion to individual's water wells from use of toxic gases that get into their wells from fracking. Please don't pollute the air with toxic chemicals used in fracking which increase the risk of cancer to families living in the fracking areas. Please respect those living in the fracking areas as human beings. They deserve better. There are other ways to collect natural gas. Would you want your family raised in a fracking area? I think not. Sincerely, Jeanette Kors Tacoma Wa.	8/10/13 4:00

Thomas C	Hoffman	14228	NY			8/10/13 6:31

Steven	Mazzarello	76226	TX		We have to protect some areas of the country from fracking and the resultant air & water pollution, and public lands are the logical place to do so. If regulators had lived through the natural gas & fracking boom in the Barnett Shale like I have for 5 years, there would be no consideration of allowing drilling on public lands. I have migraines from the resulting VOC emissions, and many local residents are getting sick with cancers. PLEASE PROTECT PUBLIC LANDS!	8/10/13 6:54
Marion	Hilliard	32073	NY		Fracking in our National Parks will ultimately reduce the pleasure tourists and U.S. citizens now enjoy and the economic benefits from their visits. This will make a huge difference in monetary support obtained which is a huge financial benefit to the park's budgets. Nobody wants to spend money to see destruction, new roads, and heavy equipment --- all of which are eye sores. There is a noise factor to also be considered that I am positive will disrupt natural habitats.	8/10/13 7:11
James	Reischman	45213	OH		This land is "not" for the Corporations.	8/10/13 7:15
Lin	Barnes	80020				8/10/13 7:18
Daniel	Shively	15701	PA			8/10/13 7:18
Jane	Bischoff	10128	NY			8/10/13 8:01
Margaret	Goodman	19342	PA		Public land should be managed for the benefit of the public, not for the polluters.	8/10/13 8:10
Katherine	Latham	37027	NY			8/10/13 8:20
Judy	White					8/10/13 8:23
Jane	Schley	54701	WI		Fracking is wrong for many reasons, leftover chemical poisons injected into the Earth and methane gas being released and burned off are top on the list. Energy companies are SELLING our gas and oil to the highest bidders (foreign countries)! Fracking kills. WE HAVE BUT ONE EARTH. Please do NOT buy in to the LIES of the energy industry. BLM ..."management" should NOT mean raping and pillaging Public Lands. PLEASE keep BLM lands SAFE ! Thank you.	8/10/13 8:26
Nancy Lc	Cowger	60090				8/10/13 8:27
Ann	Lundy	21210	MD			8/10/13 8:32
Katherine	Santos	49507	MI		I, Jenne Kate Rooks, request the BLM to ban fracking on public land until further studies reveal that it is environmentally safe and non-damaging to public health.	8/10/13 8:37
peggy	conroy	12992	NY		water and air & soil quality are more important that wells that produce for 5 years then become unprofitable while their owners never clean up the damages	8/10/13 8:39

Robert	Schulof	11201	FL			8/10/13 14:40

Noel	Moore	46804	IN	<p>It is our land. The corporations and corporatist have continually placed their selfish interests over the public good and in fact are poisoning all of us beyond any chance of surviving - this is true. They are slowly poisoning us and the environment. Make no mistake. We are being killed. This is a public health issue that goes unheeded because the lawmakers are bought and sold by the same corporate interests that lowers the pipe into the ground to shoot it full of poison. The water used to frac is ever after ruined...the atmosphere that is asked to take in the particulates and smoke, and toxic fumes is ruined...the earth is no longer useful for generating food. We have been used by those who are not interested in our welfare. Will there be some mechanism of government that stops the folly? Will there be a leader that rises up against the foolishness without being assassinated? Will the people themselves spontaneously form world wide non-violent protests against the trends that are going to kill us all? I want a ban on fracking because I still theoretically matter to my lawmakers. They can make such a law. They can begin the healing process. If they wait, it will take more than mere petitions to start the process. After we know it is too late, they will see the people quietly protesting in the streets while waiting for their death. In the end, the lawmakers will wonder if they could have made a difference. If they don't start now...they wont. Get it done...or get another job.</p>	8/10/13 14:48
Emma	Stark	90068	CA	<p>I want to see a viable planet left for our children and the other life forms on this planet. The risk of further contaminating our water supply is too high with fracking.</p>	8/10/13 14:49

					As a member of the Conservation Board of my Town, I am deeply concerned with water resources. Although fracking offers a temporary bonanza for some people, the probable consequences will be disastrous. (1) fracking involves the injection of highly toxic chemicals into the rock strata; (2) If not done properly, it can (and does) pollute drinking-water sources; (3) it consumes millions of gallons of water, which come from existing aquifers; (4) Contrary to the appealing TV commercials, frackers will tend to avoid environmental safety measures in order to squeeze out every possible penny of profit--this has been the deplorable record of corporations in every field--(5) human error is an ever-present danger, and the consequences can be horrifying. Consider the cases of the EXXON VALDEZ and BP's DEEPWATER HORIZON offshore oil well as just two of many examples. Taxpayers, whose dollars support our precious reserve of public lands, should not have to subsidize private profit-seeking to the detriment of public lands and water.

Luanne	LaPierre	01082	MA		These are lands set aside for the people to enjoy, not as a source of revenue for a few. The danger to ruining these unspoiled areas is not worth the end result!	8/11/13 8:22
Norma	Dayton	34293	FL		water is one of our most precious resource please respect our planet	8/11/13 9:02

Claudia	Ouachita Riverkeeper	71201	LA	Ouachita Riverkeeper	Fracking is an environmental hazard. It is life threatening to people and animals in the vicinity - and depending on where the water goes not only the vicinity. We have the technology to get away from toxic fuels, so let's use it! Natural gas may seem easier and cheaper now, but it will cost us a lot more to repair the damages in the long run than using really clean energies such as wind, solar and geothermal and promote them as much and as fast as we can.	8/11/13 9:05
Michael	Wilson	29466	SC		Stop the insanity! The laws of unintended consequences weigh heavy with these decisions, I fear.	8/11/13 9:06
Kirk	Sullivan	32819			protect the people and the land, not corporate profit	8/11/13 9:07
Bob	Sacksteder	49097	IL		We should not open public lands to fracking until the industry agrees to divulge what they put in the ground and reduce the footprint they make and leave behind. Also, we know that a road cut through wilderness dramatically affects the environment. Our public lands are owned by all taxpayers and should not be compromised for short term gain.	8/11/13 9:07
Esther	Garvett	33186	MO			8/11/13 9:07

Roy	Fuller	12032	NY			8/11/13 12:07
Cynthia	Piano	61301	IL		I am a scientist who works on rivers in the Great Plains. Our aquifers and streams are crucial to agriculture, municipal water supplies, and aquatic life. Once polluted, there is no known way to clean up an aquifer-- we are not even at the beginning stages of understanding the ecology, hydrology, and remediation of ground water resources. Our aquifers are vital to our economy and our ability to live in this important region, yet we have little science to guide us on how to keep them healthy. The only solution is to avoid irresponsible and ill advised projects from permanently damaging our aquifers. Fracking is a short term solution that will leave devastating, long term problems. It is not the way forward.	8/11/13 12:08

					I studied the negative impacts of open-pit, cyanide leach mining as a member of the Okanogan Highlands Alliance, which successfully convinced the WA state water pollution control board to NOT issue permits for the proposed Buckhorn mine. One principal we learned was that of hydraulic continuity--the interconnectedness of ground and surface water. Although fracking often takes place below groundwater levels, the hydraulic fracturing itself literally does just that--it fractures the hydrology of the area. In addition, the "Haliburton exemption" finagled by Dick Chaney means that there need be no disclosure of chemical compounds injected into the ground. This defies common sense and best practices. How can agencies and the public review data that is non-existent? I urge you to put a moratorium on fracking on public lands unless and until the technology has a proven track record of safety. The partial data so far suggests problems with well contamination, enhanced seismic activity, and lack of liability and accountability on the part of companies which have the potential to cause irreversible damage to our watersheds and communities. Sincerely, Edward W. Rehanek, Jr., registered voter

Rachael	Harris	90024	CA			8/12/13 12:18
Beverly	Walker	78639	TX		Because the oil companies have consistently lied about everything and because we should be using and continuing to develop the many other options.	8/12/13 12:20
Brenda	Lee	90712	CA		STOP THIS INSANITY! We DO NOT NEED TO FRACK UP ALL OUR LAND, AIR, AND WATER so these companies can make an even bigger profit from LNG on the open market. This is NOT FOR US! ALL WE GET IS THE POLLUTION, a future of health problems and higher natural gas prices. Let's not forget how this process contributes to CLIMATE CHANGE. This is NOT what our PUBLIC LANDS and NATIONAL PARKS are for. This is NOT in our NATIONAL INTEREST. BAN FRACKING NOW!	8/12/13 12:22
Kristina	Paris	53211	WI		We can't replace what we damage. Protect it in the first place!	8/12/13 12:23

Lanlan	Hoo	60189	TX		Fracking is an absolute nono, it could and did cause earthquake, landslide and wastes humongous amount of pure drinking water (required for fracking), not to mention its great potential of poisoning our ground water (a mixture of around 200 kinds of toxic chemical are used in the process of fracking). Pure drinking water is essential to life, without which nothing else matters. Last but not least, trillions gallons of pure clean drinking water is transformed into toxic one by fracking, which can't be recycled and presents a huge problem of safe disposal.	8/12/13 12:23
Kelsey	Brasseur	83864	ID	Lake Pend Oreille Waterkeeper		8/12/13 12:24
Christian	Friedrich	06880	CT		I like clean drinking water, and leaking Methane is nasty green house gas. Not to mention the burn off of overflow gas.	8/12/13 12:24
Valerie	Hill	90807	UT			8/12/13 12:25
Ivy	Rees	87507	NM			8/12/13 12:27
Edward	Fahy	07059	NJ		It is disconcerting that fracking on public land is being considered. The potential for devastating the environment is enormous. Greed is so evil.	8/12/13 12:27
Kendra	Spurling	78124				8/12/13 12:29
Thomas	Dolge	17922	PA			8/12/13 12:32
Janice	Barrett				Our public lands belong to ALL of us. Our public lands serve in a variety of ways that enrich the lives of Americans: watershed protection, recreation, spiritual renewal, wildlife habitat protection, hunting, fishing. They should never be made available to any corporation. When this happens, it is solely for the enrichment of that corporation and all the services listed above are negated because of the extreme impact on land, water and air by gas drilling and fracking. When corporations can no longer buy and own our politicians, the threat of this kind of rapacious abuse of our public lands will decrease dramatically.	8/12/13 12:32
Bobbi	Bauer	33412	FL			8/12/13 12:34
Joe	sirgo	44721	OH			8/12/13 12:35

					I understand the need to utilize the energy resources available for development and keeping our economy growing but I also know how the world work. I would have no problems with the development of all our natural resources, even on public lands, but for the fundamental dysfunction of our government at this time in history. Our regulatory agencies have been defunded and their power to protect us has been attacked at every opportunity by greedy and avaricious businessmen and politicians. So, until that situation is vastly improved we cannot trust those who would lease public lands for energy development until they stop trying to influence our political process. Until such a time that we have political reform sufficient to impose the will of the majority on these overly powerful groups, and a regulatory framework that is set by scientific (data driven) processes rather than political process we cannot allow public lands to be raped (for lack of a better word) or for further economic resources to be given over to those who have shown themselves incapable of doing the right thing absent an intervening government force. For these reasons I support a ban on ALL FOSSIL FUEL EXPLORATION AND DEVELOPMENT ON PUBLIC LANDS. Glen Hackney

					<p>As long as we use money as a medium of exchange, we will always have poverty. It's the basic economic principle of supply and demand. There must be a constant and increasing demand for money; otherwise it's valueless. Those who most need money must continually labor for it simply to survive. The more people need it, the more willing they are to do abominable things to get it. Wealthy and politically powerful people control the money supply, restricting global trade for profits. Used for world domination and the spread of terrorism, those who control it wage wars and pass trade agreements impoverishing the many to benefit the few. We don't have to barter individual goods and products. By voluntarily using our skills and abilities to benefit humanity by structuring service, social and industrial unions to produce, develop and distribute the world's resources we can abolish the overwhelming social ills caused by money: poverty, homelessness, global environmental destruction, waste, illiteracy, war, injustice, crime, slavery, governmental and corporate corruption and fraud, overpopulation and ill health around the world. Only by abolishing money can international cooperation secure genuine world peace, aided by the use of Esperanto, the international language of peace. Workers, union and nonunion, know who supplies what, where to find the best quality products and the people who can get the job done. Businessmen want only those who can do it fastest with the cheapest available materials and methods. Unions organize to represent the workers' interests; Businessmen, voracious for profits, by and large oppose unionization. Labor unions would be the primary centers coordinating administrative duties and information about availability of goods and services locally and globally, nationally and internationally. They would manage local, state or large cities for primary services such as food, water, shelter/construction, sanitation, education, healthcare, recycling, clothing, power/energy, the environment, labor and for other fields of endeavor, such as entertainment, fire and police</p>	
Timothy	Gilmore					8/13/13 12:39

Kelly	McCaughey	94610	FL			8/13/13 14:43
Gail	Clark	10310	NY		Considering how many millions of people are downstream of the aquifers at risk, I believe the impact investigations and proposed oversight regulations are woefully inadequate. Public land should not be used for this inherently unsafe practice.	8/13/13 14:55
Cindy	Lowry	35206	TX			8/13/13 15:09
bernice	roberts	12463	NY			8/13/13 15:11
Rose-mary	Sforza	12723	NY			8/13/13 15:16
John	Perykasz	10707	NY		The fossil fuel extraction process has way too many dangerous and irreversible side effects to both the environment and ultimately to every living thing in the area of the fracking extraction operations. The speed at which this dangerous practice is proceeding without judicious regulation can only lead to bad results and severe monetary consequences which will be burdened by the public.	8/13/13 15:31
Arlene	Brown	12010	NY		we cannot destroy, deplete & contaminate our water, pollute streams, ponds and drinking water. Fracking will destroy our most necessary resource. How could you even consider it?	8/13/13 15:54
Cheryll	Blevins	88046	NM		Hydraulic fracturing is a pig in a poke. Particularly in the American West, we are expending huge amounts of water to frack . Climate change and drought in the West is real and the West has little water even in good years. We cannot afford to pollute or waste any of our water in pursuit of short term monetary gains for large oil and gas corporations. Our water and our land is our future. Escaped gas from fracking is a potent greenhouse gas. Fracking activity disturbs wildlife and habitats. Keep fracking off public lands; we need more stringent regulations, not weaker ones!	8/13/13 16:04
Norris	Love	60093	ME			8/13/13 16:13
Barbara H	Jensen	85716	AZ		These public lands belong to all of us--all Americans--and to our children, grandchildren, and beyond. To ruin OUR land, use up OUR water, and pollute OUR air so that already-rich companies & shareholders can make even more money is just plain evil and goes against the principles of our nation--by the people for the people, of the people.	8/13/13 16:13
Van Anh	Le	k2j5m1	AZ		This land is OUR land, NOT corporation land! Anyone that needs clean water to survive should be against fracking on ANY land!	8/13/13 16:16

Howard	Booth	89005	MO		I am overwhelmed by the list of environmental and social problems impossible to adequately mitigate that cause reduction in our nation's standard of living with fracking underway on our public lands.	8/13/13 16:48

Rachel	Seifert	98310	WA			8/15/13 20:41
Judith	Emerson	77055	TX		Please maintain the beauty and integrity of our magnificent public lands! Thank you.	8/15/13 21:35
carol	jagiello	07403	NJ		This land belongs to the public. It is the legal responsibility of government to PROTECT ALL COMMONS not exploit them for gain of very few. Extractive industry destroys protected land water and air intended for all. The BLM has over stepped its purpose. give away to special interests for years . giving away public assets to extractive industries with out regard to harm or law. Blm seems no more than front for industry or it wouldn't hide the science weather its grazing, mining energy or water. shameful and illegal.	8/15/13 23:36

Michele	Pereira	90045	CA		My health, my families health and future generations health. STOP this problem before its too late.	8/16/13 0:05
Erik	Svehaug	95062	CA		Allowing the destruction of fracking is at odds with your responsibility of management and preservation. Visit existing fracking sites; taste local water; imagine living downstream from some of the ridiculous containment ponds. Please revise your position and preserve our National Parks.	8/16/13 0:59
Arlene	Joyce	94530	CA		I expect the Obama administration to PROTECT public lands from abusive corporate behavior, including fracking on public lands. Public lands should be kept pristine for the enjoyment of generations to come. Public lands should not be revenue sources for any government.	8/16/13 1:42
Raquel	LeBaudour	96080	CA		We must look after our environment and preserve what we can for our children's children.	8/16/13 2:27
Cathy	Coffey	32953	FL		I believe that fracking on ALL land and water should be banned. The greed that oil companies have shown in pursuing fracking clearly shows that they do not care about our land. Who's going to be stuck cleaning up their mess 10-20 years from now? Will there even BE a way to clean it up? Or will our children and grandchildren never know the taste of a cold glass of water? Stop fracking NOW before it's too late!	8/16/13 3:47
Kristi and John	Cumming					8/16/13 7:49
Michael	Smelcher	37404	TN			8/16/13 8:45
ellen	goodman	02914	RI			8/16/13 10:38
Andrew	Foertsch	33705	FL		The oil and gas companies are polluting our water supply causing damage to plants, animals, and people. The ramifications of unregulated fracking have yet to be determined but already serious damage has been done to our environment and to teh health of those in the vicinity of the drilling.	8/16/13 10:39
Jean	Sommer	44131	OH		When I first visited America in1958 I was enthralled by the natural magnificence of the landscape. Being a hiker from England it was such an exciting contrast.	8/16/13 10:46
Karen	Janata	80634	CO		What will our land look like in a few years with the amount of fracking going on. Please stop this insanity	8/16/13 10:57

					We do not inherit the earth from our ancestors, we borrow it from our grandchildren. Lets leave things better than we found them. Not worse. The greatest threat of fracking is the contamination of our water supply. It has been shown again and again that there is no possible way to contain oil on this scale. Not only does the water supply suffer, but so does the land, all the animals that live on it, the families that call it home and the local economy. Do you think anyone wants to visit a national forest or open space covered in oil with the racket of drills all day? No. Absolutely not. That means the towns around these national TREASURES will suffer without tourism revenue. Please don't fracking frak my country. Maintain your integrity and come up with a more creative, better, more sustainable solution. Thank you	8/16/13 11:00
Ashley	Robello					
Vic	Frederick					8/16/13 11:01
Ruth	Darden					8/16/13 11:03
Ray	Bellamy, MD	32303	FL		Those lands belong to US. They should not be turned into industrial zones and despoiled. Fracking is bad wherever it is done but should not be allowed on OUR lands.	8/16/13 11:04
Sonya	Myers		FL			8/16/13 11:27
Laurie-Ann	Curry	47431	IN		After seeing what fracking does with my own eyes, knowing what the process is doing to our precious, precious fresh water supplies, not to mention the direct impact fossil fuels have on climate change, all I can say is NO MORE FRACKING	8/16/13 11:27
alix	mullins	95003	CA		I want my grandchildren to experience our clean national parks, how dare you consider letting the oil industry destroy them ??? What happened to protecting public lands? Allowing irresponsible greedy oil companies free reign to drill and destroy in our national treasures is shortsighted and stupid. In short, , this is a terrible idea! Please don't allow it!	8/16/13 11:30
Howard	Mock	60645	IL			8/16/13 11:31
Lisa	Donaldson					8/16/13 11:32
A	Tindell				Damaging our public lands for private gain is inexcusable!	8/16/13 11:32
Meagan	Braganca	21042	MD		Stop fracking for dirty energy!	8/16/13 11:34

Rachel	Tomlin	54476	RI		Dear BLM, We the people own the public lands. We the people want the public lands to be healthy. You are required to make choices based on the highest good of the land and the people of this nation. Fracking IS NOT healthy for the land and inhabitants. Corporations DO NOT own the land to destroy at will for their monetary gain. So, I respectfully urge you to ban fracking and make the choices to do what it takes to keep/make our public lands healthy for all living creatures on this planet. The lives of millions are in your hands. The effects of your choices will be endured for centuries. Do the right things now. Respectfully, Rachel Tomlin	8/16/13 11:36
Lisa	Rochelle	18063	WV		These are OUR lands not for the corporations to rape and expunge all of the natural resources for their profit!!!!!!! I can not state strongly enough how opposed I am to these policies and can not believe that you are not doing your due diligence to protect these lands!	8/16/13 11:42
Tom	Mohan					8/16/13 11:55
Jim	Sandoe	17522	PA		Anyone who reads the list of fracking fluids should be able to figure out that this can't be good for the earth.	8/16/13 11:56
Marguerite	Barragan	95076	CA			8/16/13 11:58
Drew	Harbin					8/16/13 12:00
Detong	Choyin	94109	CA		Fracking ruins water supplies, is affecting homeowners' mortgages...we need to develop clean energy like solar and wind energy. We're ruining our wonderful country.	8/16/13 12:00
Caroline	Courtright	95949	CA			8/16/13 12:15
Janet	Marbury	94061	WA			8/16/13 12:18
paul	tescher	45711	OH		Fracking is inherently dangerous to living, breathing creatures which are interdependent to continuing to live! Water quality being the major aspect of life that is threatened by this monumentally stupid practice, It's simple as that. It's high time to take a serious, non-industry paid, unbiased scientific examination of it's effects; a moratorium beginning immediately would exercise the most common of sense.	8/16/13 12:19
Robin	Mazza	77007	TX		I cannot bear to hear of what it is doing to the water supply and even to our own earth. It is an outright danger to all of us!	8/16/13 12:25
Karen	Shapiro					8/16/13 12:31
Kevin	Paulus					8/16/13 13:24
Amber	MacPherson	80203	CO			8/16/13 13:46
Deborah Elise	White	30030				8/16/13 13:49

john	kastner	14609	NY		fracking has a proven record of environmental destruction.national park lands and national trusts are iconic symbols of america around the world.destruction of these monuments is virtual destruction of america itself	8/16/13 14:23
Julie	Brown				The National Parks are probably the last place where we can see native wildlife and geological wonders in America. No place on earth has such wondrous places. Please leave them in peace	8/16/13 15:05
Bruce	Deterding	32303	FL		Public lands are conservation lands. They belong to all Americans. The whole concept of conservation lands was to preserve these spaces from the rigors and destruction of private sector development. Fracking is the worst sort of incursion on these lands because it not only sucks the life out of them but may very easily spoil their pristine water resources as well.	8/16/13 15:28
Helen	Anderson	97060	OR		What will we the people, owners of the public land, have left after the greedy corporate takeover enabled by our governmental offices.	8/16/13 15:50
Elaine	Burdette	30080	GA		The future of humanity depends on the land, air and water. Don't let uncaring and ignorant people ruin it!	8/16/13 15:52
Linda	McLean	90265	CA			8/16/13 16:05
Robert	Crowder					8/16/13 16:13
Susan	F	12723			I live on the Marcellus/Utica shale region. Our home is near the Delaware River and we rely on well water for all of our water needs, as do the majority of residents here. We have retired here for the clean air, quietude, and beauty of the area. Fracking this area will destroy the quality of life here and cause untold hardships for us and, again, the majority of residents here. Beyond our personal involvement in this issue, I believe that the federal government is responsible for the protection of public lands. As the steward for these very special areas, it is their duty to preserve them in perpetuity for future generations of Americans. It is our heritage. Yes, time moves on and new issues need to be considered; however, the fingerprints of corporate profit at the expense of public interest are on these less than comprehensive guidelines. In the end, it is because of the new challenges that these are protected areas. They are meant to conserve these areas as they have been and they are today. The only voice our natural parks and protected areas have is the voice of the people. It would be a sad legacy to this time and your administration were protection to be inadequate to the promised task of preserving the pristine beauty of our land.	8/16/13 16:19

Reisa	Gould Donath	12866	NY			8/16/13 17:04
John	Fernandez	03841	TN			8/16/13 17:23
Carol	De Hart	93446	OH			8/16/13 17:24
Adrienne	Howell		NC		I do not want us to pollute the groundwater supply. Without water gas is irrelative don't you think? Besides all that drilling and stuff has to make the ground above somewhat unstable.	8/16/13 17:38
matthew	dean		FL		They need to ban fracking PERIOD!!!	8/16/13 17:45
Elizabeth R.	Hallett	97520	OR		Fracking is a diversion and a scam. We cannot afford the luxury of more carbon discharges. Also the methine involved is even more damaging than the CO2.	8/16/13 17:46
Dave	Rich	81302	CO			8/16/13 18:26
Lanie	Craig	80027	CO		We recently took a river trip on what was supposed to be a remote area of Utah. While we never saw other people, we could smell the fumes from the fracking wells up on the mesa above us. We were appalled to see that for miles and miles in every direction gas wells were packed in as close as they could reasonably be placed. Antelope were wandering through the frack pits. I could not believe how the government has allowed industry to destroy the wildlands of this country. The damage that has already been done will take hundreds and hundreds of years to repair. We cannot afford to keep doing this. Is there no limit to the corporate greed that drives this? We should be reducing dependence on fossil fuels. The the technology is there - let's use it!	8/16/13 18:35
GRACE	NEFF	97322	OR		This is our, the publics, land and we will not stand still and let this degradation by land grabbers continue.	8/16/13 18:59
Erika	Wurth					8/16/13 19:13
Elsie	Ardry	71292	LA		Not fracking on public lands is important to me and should be important to all of America because fracking is unhealthy for us, for our land, for our water, for our air quality, for our economy and for the future of our children and grandchildren.	8/16/13 19:19

David	Shelton	28020	NC		I can't think of any industry more in the news as regards the release of toxins into our water supply. Clean water is far more important than obtaining natural gas by means of polluting and contaminating private property with no recourse for the owners. Even if the frackers were required to pay for the damage they've done, it would not make up for people having to abandon their homes to avoid toxic chemicals in their water. Wildlife on our public lands must also be protected. It is absolutely outrageous that this can occur in our country and it must stop. Establish regulations that will assure no one will suffer poisoned water, and that our wild places will not become a playground for these 'energy producers'.	8/16/13 20:43
Bettie	Reina				This land belongs to the people not to a profit-making corporation.	8/16/13 21:15

Jaremy	Lynch	04079	CO			8/17/13 20:53
belle	hollon	87510	NM		I am outraged that the managers of the BLM would permit this to occur on our public protected lands!	8/17/13 21:49
Dave	Zuba				Fracking is a deadly practice, no matter what the naysayers believe. Our land, water, air and way of living a healthy life is being destroyed for corporate greed and profits. The evidence against fracking is overwhelming and must be banned now. Leave our public lands alone.	8/17/13 21:59
anne	morton	75219	TX			8/17/13 22:06
belle	hollon	87510	NM		I support a ban on fracking in general. But especially on the BLM lands, not only because I share a boundary with the BLM in New Mexico, but also because I consider it a violation of our public (protected) lands.	8/17/13 22:17
Detong	Choyin	94109	CA		We have other choices that will not destroy the land and/or people's lives. It's ridiculous we have to keep talking about this. Fracking is proven to be harmful. We need to develop alternative green energy sources and we need to do it now.	8/17/13 22:29
Pam	Krimsky	12528	NY			8/18/13 2:42

Barbara	Griffin	14886	NY		Public land is just that: PUBLIC LAND. It does not belong to, nor should it be exploited by, private corporations. CORPORATIONS ARE NOT PEOPLE, my friends.	8/18/13 8:26
Barbara	Dickins	52556 8808	IA		I want to see free energy--not life on earth destroying energy.	8/18/13 9:18
Sheri	Eisenbeiser	48108	MI			8/18/13 10:46
A.L.	Steiner					8/18/13 17:46
Deborah	Fisher					8/18/13 17:50
Maryann	Lesert	49348	MI		Fracking and any oil and gas development should be banned on public land. Fracking, in particular, threatens water, soil, air, ecosystems, wildlife, and human communities in ways that go well beyond so-called "conventional" oil and gas wells. This distributed, industrialized, unconventional process does not belong in our most beloved, public places.	8/18/13 18:07
Jeff	McCollim					8/18/13 18:32
Emily	English	11738	NY		BLM, it has become clear to America that the only job you do is broker off our public land to big coal and oil. You are the real terrorists we need to be afraid of. Capturing wild horses and send them off to slaughter so some monster can blast away mountaintops for mining is pure evil and a crime against life. You demons! Every single one of you should be hanged!	8/18/13 19:57
Barbara	Pate	91730	CA		We need to preserve our land and natural resources for our children and grandchildren. Fracking destroys valuable land!	8/18/13 21:01
Laura	Franklin		AZ		We need to cherish our natural beauty and leave it for our children, grand kids and on to enjoy!	8/19/13 2:17
Susan	Marks	54616	WI		Public lands belong to the people and other life that depends on them for survival. Stop fracking now. Our government should be promoting alternative energy instead of supporting these corrupt industries which are ruining our world.	8/19/13 9:48
Daniel	Wohl	10536	NY			8/19/13 10:00
Lori	Vellucci	02865	RI		Fracking is unsafe and will harm our environment and our health. Corporate profits should never be the reason we do something that can be harmful to us and the environment!	8/19/13 10:00
Anna	Ebell	98403	WA		Protect our planets resources. There are alternatives we should invest in. Destroying the planet for future generations to satisfy the greed of a few is not an option. The needs of the many outweigh the needs of the few	8/19/13 10:01

Samantha	Perry	21211	MD		As a student of environmental law and public lands, I understand the competing interests at work in managing such a large swath of our country. I hope that you consider the future of our nation and the continued positive role that our federal lands can play in deciding whether to sell these lands and others for the purpose of hydraulic fracturing, which has caused environmental and personal harm across the nation. It brings some short-term benefits to large companies and some folks' natural gas prices while hindering the nation's move to sustainable and less invasive forms of energy. As land management agency, I ask that you do all in your power to limit the access of and damage done by these private interests. Thank you.	8/19/13 10:07
Jill	Wenner				Because it will destroy the public lands for anything else.	8/19/13 10:10
Alec	Griswold					8/19/13 10:14
Joanne	Dzubinski				Everyone should have a say about what happens on public land. It's fate should NOT be decided by corporations who stand to benefit financially from industrial use of the land. Public land is for everyone, not just corporate CEOs. Clean and safe energy alternatives should be our goal, not drilling for more fossil fuels or natural gas. Please ban fracking on public land.	8/19/13 10:18
Laura	Kellman	21409	MD			8/19/13 10:35
Sheryl	Barnes	12582	NY			8/19/13 10:42
Berit	Wenner	07866	NJ			8/19/13 10:44
Christina	Dilko	06776	CT		Fossil fuels can be replaced. Potable drinking water cannot.	8/19/13 10:45
Dean	Taha	33166	FL		Our land should be protected not raped	8/19/13 10:46
Nedi	McKnight		HI		Please don't jeopardize our beautiful Earth for a short and destructive means of obtaining petroleum. Even the people that work for the fracking industry know that fracking is wrong.	8/19/13 10:50
emily	feinberg	11963	NY			8/19/13 10:50
Elliott	Jones	30307	GA			8/19/13 11:11
Sandra	Ringener	89434	NV		I want to keep our country pristine, or as pristine as we can from here on out. We need fresh, clean drinking water more than we need to dredge up unsafe, dirty fossil fuels. We have alternative, renewable, clean fuel sources, we just need to move forward in implementing them. We only have ONE planet, we have no where else to go when this one is destroyed or made unlivable. Don't mess it up for all of us because of pathetic greed of the few.	8/19/13 11:13
patrick	hono		NY			8/19/13 11:21

Gail	Harty	55949	VA		The poisoning of the water cannot be undone. This is only one of the KNOWN dangers of fracking. We need to find a better alternative, which surely exists. Thanks you, Gail Harty	8/19/13 11:23
Martine	Saura	J0K2N0	QC		Stop poluting the water ! We drink it .	8/19/13 11:28
Justin	Tuttle	28211	NC			8/19/13 11:31
b	Culbreath	30327	GA			8/19/13 11:35
Stephan	Beauchamp	H3J1M8	QC			8/19/13 11:39
Donna	Williams	92119	CA			8/19/13 11:40
Shelly	Martin	80301	CO			8/19/13 11:47
Janice	Luft	48107	MI		We should not enable those who are blind with greed to steal the health from others or the future from citizens who will have to find there way after us. An excess of useless junk is destroying the planet. Fracking is akin to a weapon of mass destruction - what goes into the Earth also comes back out of it. Stop injecting toxins into the ground, water and air. This process is a waste of precious water.	8/19/13 12:08
Keven	Canning	07740	NJ		Hydraulic fracturing has been proven to be an unsafe and dirty source of natural gas. The only thing keeping fracking moving forward is political corruption and lying energy corporation. Please ban fracking and do what is right. And I don't just mean on public lands. Allowing it on private lands allows companies circumvent what is right, for what is profitable.	8/19/13 12:21
Kevin	Bradley	91367	CA			8/19/13 12:24
Ron	Seibold	66044	KS		You are allowing money-crazy frackers to waste precious water resources and contaminating what is left after you take the money under the table to let them do their dirty work. You want your kick backs so they can get quick profits even though it is destroying the future of humanity. Frackers and BLM officials who support them need to be prosecuted and given very long prison terms.	8/19/13 12:32
Pat	Mac	04605	ME		Public land is for all citizens and wild life to enjoy...lets keep greedy,polluting corporations out.	8/19/13 12:33
Jeannie	Bilodeau	07735	NJ		Public Lands to used by the Public should not be Fracked. Tainting Water Sources is not good for people or animals and the practices employed by Frackers are not safe.	8/19/13 12:40
Patricia	Saulter	77545	TX		Solar. Wind. Encourage alternatives that do not destroy our environment.	8/19/13 12:49

Patricia	Marshall	77430	TX		The best way to protect our revered public lands and our water, air, health and climate from fracking is to prohibit this inherently dangerous form of fossil fuel extraction. Please ban fracking on public land. Thank you!	8/19/13 12:50
Ashley	Chengerian	10018	NY		To protect our nation's aquifers.	8/19/13 12:54

Christine	Traettino	22314	VA			8/19/13 22:22
Connie	Nelson	64058	MO		Public land is for the American public not for Corporations to destroy the water & land so they can make more money ... they are already rich enough & don't give a damn about us or our planet.	8/19/13 22:31
Dorothy	Mather	48822	MI			8/19/13 22:46
Arthur	Norris	52803	IL	Quad Cities Waterkeeper of the Upper Mississippi		8/19/13 23:02
Claudia	Fletcher	94044	CA			8/20/13 0:28
Carol	Buffington				Please don't do this. We are ruining the Earth we all live on!	8/20/13 1:34
Nora	Kayden	30062	GA		Our National Parks are the most gorgeous part of our country. Please don't ruin them with fracking and drilling operations. Invest in clean energy!	8/20/13 2:06
Jennifer	Sipula	62243	IL			8/20/13 2:54
Morgan	Mullins	40351	KY		This is the era of cleaner technologies and global community responsibility. It's hypocritical and unethical to condemn other nations for their mistreatment of natural resources, then turn around and put the lie to our own reputation as a leader in progressive practices by allowing duplicitous corporations to rape the land and harm countless lives and ecosystems with the dangerous process known as fracking.	8/20/13 2:56

Dottie	Sisco	71107	LA			8/20/13 7:12
Deanette	Bielby	80128	CO		Resist the global dependency on a limited resource. Americans can live with lower standards of living such as a/c & various other modern perks when faced with global disaster and resource depletion. For the future generations--let's develop solar storage, wind, and hydro energy--let's care about the future of others & not just our immediate "needs."	8/20/13 7:19
Mandie	Simpson	25560	WV		I believe these lands should be kept as pristine and authentic as possible. It is our duty to the future generations to preserve the awesomeness that we have known. Please don't allow this.	8/20/13 9:26
Jill	Heryford	98070	WA		I'm part of the public. Please don't Frack up our lands.	8/20/13 9:36
Myra	Crawford	35243	AL		Most of the water used in fracking is lost to any other use. We do not have the water capacity to sustain this type of abuse to our resources.	8/20/13 10:02
Wendy	Porterfield	53092			I beg you to continue to protect these lands. As the mother of 2 young boys, I pray these lands will remain pristine for them, and theirs. As the father of 2 young girls, I must beleive you feel the same. Thank you my President.	8/20/13 10:07
Jennifer	McLaughlin	34224	FL		Because our Federal government has given too many exemptions to the oil and gas companies, we cannot trust them to protect our natural resources from further damage. Oil and gas companies care only about increased profits for their shareholders, not conservation.	8/20/13 13:23

virginia	scruggs	35222	AL			8/20/13 22:06

					I lived in Colorado for 15 years and enjoyed the beauty and pristine quality of our nation's last remaining protected natural resources, have seen the assault and ruin of some of these resources with mining, logging, climate change bringing bug infestations and mammoth unnatural fires, and know that "the Cheney Halliburton" exemption to the Clean Air and Water Acts was a political and petrochemical industry insider violation of such landmark and precedent setting legislation for the nation and the whole world. It is time to staunch and reverse the damage that such an administration wedded to one industry without precedent has caused to our lands, downstream and neighboring citizens and potential survival with the risks of permanently contaminating our nation's aquifers and water resources at the most critical time in human history as glaciers recede, and droughts and population demands increase.	
Matt	Goldsmith	90046	CA			8/20/13 22:51
Allegro	Hopkins				I value the majesty of natural landscape and clean water!!	8/20/13 23:19
Tracy-Lynn	McCoy	83402	ID		Fracking should not be allowed on public lands because it is a dangerous practice & harmful to MotherEarth!	8/20/13 23:31
Elizabeth	Clancy					8/21/13 0:16
					At first glance, I found natural gas an excellent alternative to oil. After a breif research session, I instantly saw the flaws and threats of natural gas powered transportation etcetera. There is a reason why we have "National Parks," reserves, conservatories etcetera, so their precious treasures reamin untouched and left for the native species of the area as well as for public appreciation and enjoyment of nature. Fracking, generally a weak tactic, especially when interfering with the few reamining natural habitats left in the extremely populous United States, is unexceptable. Also, it seems the public health has been overlooked as well, another flaw. I urge more research on renewable energy sources and the often overlooked idea of using algae to power vehicles as it is efficient, environmentally sound, and always plentiful. Thank you for your consideration.
