

PUBLIC MEETING

On the CSO Long Term Control Plans for the Flushing Bay and Flushing Creek

Wednesday, September 30, 2015

**Al Oerter Recreation Center
131-40 Fowler Ave, Flushing, NY 11355
6:00pm to 8:00pm**

DEP will provide a brief presentation at 6:30pm.

When there are heavy rains and the sewer system has reached its capacity, a diluted mixture of rain water and sewage, also known as combined sewage, may overflow into local waterways as a combined sewer overflow (CSO). The New York City Department of Environmental Protection (DEP) is developing CSO Long Term Control Plans (LTCP) that will identify and evaluate alternatives to reduce the impact of CSOs in NYC's waterbodies and waterways. In 2014, DEP submitted the Flushing Creek LTCP to the New York State Department of Environmental Protection (DEC) for its review. In June 2016, DEP will submit the Flushing Bay LTCP. At this meeting, you will learn about the Flushing Bay LTCP and the proposed alternatives/projects for the Flushing Creek LTCP. Please join us as we seek your input in developing the Flushing Bay LTCP.

Join us as we seek your input in developing this plan.

How to Get Involved?

To RSVP, please email ltcp@dep.nyc.gov or call (718) 595-4148.

For more information on DEP's CSO program, please visit our LTCP Program website at www.nyc.gov/dep/ltcp or follow us on Facebook: www.Facebook.com/NYCWater.
